

CONSTRUCTION NOTICE

Dear Resident:

78th Avenue Closure (Cortland to Armitage) from July 8th to July 12th

The contractor will be installing a new 30-inch storm sewer across 78th Avenue beginning on Monday, July 8th. This work will involve replacing a section of the existing 72-inch diameter combined sewer where the new 30-inch storm sewer crosses and bypass pumping of the 72-inch sewer from the manhole at Armitage to the manhole north of Cortland. In order to complete this work, the contractor will be closing 78th Avenue between Cortland and Armitage. Local traffic will be permitted for access to homes, however vehicles will not be able to pass through at the alley south of Armitage as the entire width of 78th Avenue will be closed at this location. We anticipate reopening 78th Avenue on Friday, July 12th, if the weather cooperates.

Questions or Concerns

We thank you for your patience during construction. If you have general questions or special needs please contact Orion Galey of Christopher B. Burke Engineering, the project's on-site representative. Messages can be left for Orion Galey at (847) 833-0210.
